December 28, 2022

Dear Parent(s)/Guardian(s):

Unfortunately, due to the cold weather, WIS experienced two burst pipes. Fortunately, pipe issues were discovered early and the restoration/cleanup/rehabilitation company moved quickly to minimize the damage. That said, two locations, the Media Center and Room 201 sustained the most damage: flooring and a heating coil. We anticipate the flooring and the heating coil being replaced by the end of next week. Therefore, the Media Center and Room 201 will not be accessible for student or staff use next week. Note, during the floor replacement project in Room 201, we will be removing some asbestos tiles. All required abatement procedures and clearance testing will be performed. This abatement is scheduled for tomorrow. The District is working with an environmental consulting company and will be conducting air samplings. When available, the District will post the environmental testing results on the "Facilities" page on the District website. We will continue to keep you updated.

Sincerely,

Eric Laughlin
WIS Principal

Tracy Handerhan
Superintendent of Schools
